

# POOL LAB

## SALT METER

### Features

- Fully sealed body – No more leaking battery compartments
- Enclosed long life lithium battery – years of testing
- Non-polarising sensors – improves accuracy & reduces need for calibration
- Accurate +/- 5%
- Rugged – built tough
- Temperature Compensation to maximise in-shop testing accuracy
- Non-Temperature Compensation to maximise accuracy for in-situ pool testing
- Salinity reading in ppm - measures 0 to 10,000ppm
- Automatic OFF
